

# 第436回川崎医学会講演会

日時：平成31年2月8日(金) 17:00～18:00

場所：図書館小講堂

座長：樋田 一徳

## 「OVERVIEW OF MEDICAL EDUCATION AT OXFORD」

### Zoltán Molnár MD DPhil

Fellow of St. John's College

Professor of Developmental Neuroscience

Department of Physiology, Anatomy & Genetics,

University of Oxford

Medicine has been taught at the University of Oxford for at least eight centuries (<https://history.medsci.ox.ac.uk>). The Medical School at Oxford is relatively small, allowing students and staff to get to know one another (<https://www.medsci.ox.ac.uk/study/medicine/pre-clinical/structure>). The Medicine course at Oxford provides a well-rounded intellectual training with particular emphasis on the basic science research that underpins medicine. During the pre-clinical stage of the course, the college tutorial system is a central feature. All students at Oxford undertake an experimental research project as part of their BA in Medical Sciences. Professor Molnár shall give examples from his own research and preclinical departmental teaching (<https://www.dpag.ox.ac.uk/team/zoltan-molnar>) and from his own tutorial teaching (<https://www.sjc.ox.ac.uk/discover/people/professor-zoltan-molnar/>).

※総合医療センターにてTV会議システムを介して参加をご希望される方は 2月1日(金)までに医学会講演会HPの予約フォームよりご予約ください。

《皆様のご来聴をお待ちいたしております》
