目的								
The overarching objective of this course is to enable the students to acquire the very basic daily life communication skills as healthcare professionals in a global society. Toward this objective, the course focuses on developing students' listening and speaking skills by providing opportunities for maximum language input and output in English in both daily life and healthcare contexts.								
授業到達目標								
Upon successful completion of this course, the students should be able to do the following:								
1. Introduce themselves as medical students								
2. Communicate effectively and positively in a variety of daily life situations								
3. Write a formal e-mail to their professors asking questions and seeking advice or information								
4. Answer reading comprehension and listening comprehension questions based on the lesson content								
5. Describe and use the basic terms related to medicine and healthcare for communication in real-life situations

準備学習 (予習・復習等)

Preparation before the class: Students should read all handouts or other materials assigned for the class and make notes if necessary to verify or to ask questions during the class (30 minutes or more).
Review after the class: Students should review the lesson, make sure that they have understood it completely, and make notes if necessary to ask the teacher in the following class (30 minutes or more).

講義についての注意事項

Students should be able to access a dictionary in the class quickly, especially, when asked a question the answer to which requires looking up the meaning of one or more words. The dictionary can be a paper, electronic, or online dictionary. As a general rule, students should make it a habit to use a dictionary both in and outside the classroom.

昨年度からの変更点・改善項目

As in the previous school year, the course will continue to focus on making the lessons interactive with increased student participation in all classes.
